SENTINEL®

ALWAYS LEADING

Adopt Cloud With Ease!

As your organization considers cloud adoption, Sentinel's AnyCloud Workshop can help uncover the optimal path forward based on your specific IT infrastructure requirements and business goals.

While most organizations understand the basic benefits and requirements of cloud adoption, every journey includes quite a few highly specific, customized elements that can drastically alter the impact on your people, processes, technologies, and business goals. Sentinel consultants ask questions you may not have considered, share use cases, and provide in-depth analysis based on extensive experience helping customers of all sizes and industries achieve their full potential through the cloud.

Workshop Overview

- Sentinel's AnyCloud Workshop provides a high-level review and starting point to determine if the public cloud is right for your organization. Our experts host an hour-long interactive discussion with a focus on topics such as your goals, configurations, budget, operations, workloads, and support. This enables us to identify any issues that may affect your cloud adoption and recommend next steps so your organization can establish a strong cloud foundation driven by productivity and growth. An electronic report will be provided upon completion of the AnyCloud Workshop, detailing the results and identifying whether Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Software as a Service (SaaS) or private cloud may be best suited for your organization. This can be useful when planning, budgeting, and preparing for cloud migration.

Description

- **An hour-long interactive discussion to establish the fundamentals for your cloud journey**
- **Determine if public cloud is right for your organization**
- **Identify the most beneficial path to cloud adoption: SaaS, IaaS/PaaS, or private cloud**
- **Obtain cloud analysis, use cases, and pros/cons from Sentinel's highly certified experts**
- **Start to build a cloud foundation in alignment with your business goals, compliance requirements, technology needs, and financial limits**
- **Live budget planning session around next steps, POC/POV, and migration (time permitting)**
- **Summary report provided following completion of the workshop**
