

Productivity Everywhere Express Services

THE SENTINEL DIFFERENCE

MOBILITY SOLUTIONS AND SERVICES

- Plan and prepare
- Collaborate with everyone
- Compute and connect from anywhere
- Stay secure while mobile with 24x7x365 Sentinel SOC monitoring options

BEGIN THE DISCUSSION TODAY

Schedule a custom-built workshop with Sentinel's Enterprise Architecture & Innovation team to identify the needs of your organization. Our analysis will uncover any gaps, help you establish priorities, connect you with subject matter experts, and provide your organization with practical solutions and services designed to satisfy your immediate and ongoing mobile productivity demands.

ALWAYS KNOWLEDGEABLE

WHO WE ARE

Sentinel Technologies has been delivering high quality IT services, products, and support solutions since 1982. We can help your business obtain the tools for success through our partnerships with global technology solutions leaders including AWS, Cisco, Cylance, Dell, Microsoft, ServiceNow, Splunk, VMware and more.

Continuous Productivity Wherever You Are

Whether your business strategy already includes mobile productivity elements or you suddenly need to deploy some in an emergency situation, Sentinel's productivity express services can help deliver agility for your organization and its employees. Our rapid mobility workshop features a gap analysis to determine your immediate needs, identify ideal solutions, and map to vendor promotions so you can get productive quickly. Get started by scheduling your workshop today!

STAY MOBILE AND SECURE

Most organizations have a mobile working strategy in place, but few have the tools and capacity to handle extreme mobility demands. If the number of employees working remote instantly jumps to 100%, new challenges may emerge. Your plan (if one exists) might not execute properly, the technology required might not be available, or your system might not be able to handle all the remote workers. Security is also a major concern, as organizations often lower defenses for expediency. This may be normal and expected, but bad actors will take advantage of any opportunity to compromise your environment.

- **Plan and prepare** for mobility with Sentinel's Advisory Services. We use templates modeled on industry & FEMA best practices so your organization can adapt and adopt quickly as the situation requires.
- **Collaborate with everyone** instantly in real-time through the cloud using video capabilities, contact center solutions with powerful chatbots, and even pay-as-you-go IVR.
- **Compute anywhere** with fast and scalable VPN services, home user equipment recommendations, and large-scale VDI services.
- **Secure everywhere** with advanced endpoint, network, and DNS mobile security with content filtering & protection. Available with 24x7x365 monitoring from Sentinel's SOC.

HOW SENTINEL CAN HELP

Sentinel has the experience and expertise to provide your organization with innovative, rapid, and secure solutions ready to meet your mobility needs today. Working with our partners from AWS, Cisco, Cylance, Microsoft and Splunk, Sentinel experts can help you quickly define, design and deploy workforce mobile productivity solutions that combine on premise and cloud technologies with Sentinel support and monitoring services.
