Accelerate AI Workshop

Transform challenges into opprtunities with AI

Accelerate AI Workshop

Envision the possible with AI

There's a lot of hype surrounding artificial intelligence (AI), and your organization may be tasked with developing a strategy for AI usage both now and into the future. Sentinel's complimentary, expert guided Accelerate AI Workshop aims to determine what problems AI can help solve in your organization, and offer guidance on how to build a strong plan for realizing those benefits.

Sentinel offers an in-depth Accelerate AI Workshop to help organizations unlock the potential of AI. With expert insights, you'll gain a roadmap to leverage AI technologies effectively, enhancing operational efficiencies and opening new possibilities for growth. Post-workshop, Sentinel will provide a report that captures one key AI use case, complete with problem definition, recommendations, and actionable steps for moving forward.

WORKSHOP OVERVIEW

A one-hour, expert-guided session designed to explore AI potential for your organization. Identify where AI can provide real benefits, and begin crafting a strategy for effective AI adoption.

- Ideal for organizations that are starting to identify or have already identified AI use cases.
- Engage with a framework for understanding and breaking down specific challenges that AI can address

BENEFITS

- **Strategic Guidance:** Discover how AI can solve specific problems in your organization.

- **Use Case Development:** Define an AI use case with a focus on desired outcomes and actionable next steps.

- **Focused Insights:** Receive a documented use case after the workshop that outlines the problem, recommended solutions, and a proof-of-concept (POC) outline.

SENTINEL MODERATOR QUALIFICATIONS
A strategic consultant with 25+ years of IT leadership experience focused on process, policy, and risk management. Extensive generative and traditional AI knowledge.
