

CYBERSECURITY SOLUTIONS

# Identity Workshop

Discover modern  
authentication.

# Identity Workshop

Simplify and strengthen security posture.

Effective identity management is essential for maintaining the security, integrity, and compliance of organizational systems and data in today's complex and dynamic cybersecurity landscape. We'll review and help navigate trends that reflect the evolving landscape of cyber identity management, driven by factors such as the shift to cloud-based environments, the proliferation of mobile and IoT devices, and the growing sophistication of cyber threats.

## MODERN IDENTITY PRACTICE LANDSCAPE

## WORKSHOP OVERVIEW

Workshop focuses on digital identity topics, including:

- Passwordless.
- Identity and access management.
- Privacy engineering.
- Rule based access control.
- Privileged access.
- Conditional access.
- Self-service password reset.
- Multifactor authentication.

## BENEFITS

- **REDUCE:** Reduction in phishing and password attacks leads to improved security.
- **IMPROVE:** User experience is improved allowing users to easily, and conveniently, log in to access data from anywhere.
- **SIMPLIFY:** Manage at scale and simplify to allow for single sign-on, FA management, and creation of access policies.

## SENTINEL MODERATOR QUALIFICATIONS

A 15+ year IT background including consulting, designing and deploying the most advanced/complex Microsoft technologies.
