Microsoft AI Readiness Workshop — M365 Copilot

Maximize the Potential of Your Microsoft AI Integration!

Microsoft AI Readiness Workshop

Elevate Your Microsoft Potential

Microsoft's M365 Copilot offers a revolutionary approach to productivity, allowing organizations to leverage AI in meaningful ways across collaboration, governance, and information management. Although implementing these technologies may require strategic adjustments, the right combination can simplify workflows, enhance productivity, and improve user satisfaction.

Sentinel provides an insightful Readiness Workshop to assess your current landscape and prepare for M365 Copilot integration. This interactive session delivers actionable insights, equipping your team to capitalize on AI-driven productivity enhancements. Post-workshop, you will receive a report featuring your readiness score, benchmarks, and actionable next steps.

WORKSHOP OVERVIEW

A 1.5 hour interactive session designed to guide your organization's AI readiness with Microsoft Copilot, focusing on five essential areas:

- Use Cases & Education, Governance, Information Landscape, Adoption, & Technical Readiness (security, privacy, compliance)
- The workshop is tailored to assess and optimize your readiness to integrate M365 Copilot into your environment effectively.

BENEFITS

- Identify areas that require increased readiness and find specific to improve AI integration.

- Gain a comprehensive understanding of how M365 Copilot will enhance your current environment.

- Receive a customized report with a readiness score, offering a benchmark against industry standards and highlighting areas to improve AI adoption.
